## FERTILIZERS.

ARMOUR'S FLOWER FOOD assures house-plants a healthy growth, makes them quick flowering, gives the foliage a deeper, richer green. It can be applied as a top dressing, or used in solution on potted plants while a pinch in a vase of cut flowers preserves them bright and fresh a much longer time. Make home beautiful by securing best results with your plants. Everyone can do so by using Armour's Flower Food, according to simple directions on every package.

Small size 15c, large size 25c.

### ARMOUR'S RELIABLE FERTILIZERS

Pure Bone Meal for Roses, Pot Plants and Lawns. It is ground fine and contains no odor; 1b 5c, 10 lbs 30c, 50 lbs \$1, 100 lbs \$1.75.

Raw Bone Meal, 50 lbs \$1, 100 lbs \$1.60, 200 lbs \$3.00.

Pure Fine Ground Bone, 50 lbs \$1, 100 lbs \$1.60, 200 lbs \$3.00.

Blood and Bone, 50 lbs \$1, 100 lbs \$1.40, 200 lbs \$2.50.

Blood, Bone and Potash, 50 lbs \$1.10, 100 lbs \$2.00, 200 lbs \$3.50.

**ARMOUR'S LAWN FERTILIZER**--This is a clean, well prepared fertilizer; a convenient lawn dressing for new and old lawns, etc. It can be applied either in the spring, summer or fall as a top dressing at the rate of ten pounds for a space of 20x20, or 400 square feet, or 400 to 500 pounds to the acre. Stable manure for lawns is objectionable in appearance, odor, weed seed and cost. Our **Lawn Fertilizer** overcomes all these, and supplies the soil with requisite food for a luxuriant growth of grass. 10 lbs 40c, 25 lbs 85c, 50 lbs \$1.50, 100 lbs \$2.50.

Analysis of any of our fertilizers furnished on application. Send for circular and prices of fertilizers in large quantities.

**Special Fruit, Vegetable and Tobacco Fertilizer**--This is the best for gardener's use; 50 lbs \$1.00, 100 lbs \$1.60, 200 lbs \$3.00.

Potato Fertilizer No. 386 with Potash, 50 lbs \$1.00, 100 lbs \$1.75 200 lbs \$3.25.

**Ammoniated Dissolved Bone and Potash**--For corn, cane, oats, wheat and other grain; 50 lbs 80c, 100 lbs \$1.50, 200 lbs \$2.75, ton \$25. Stable manure is a true fertilizer--all of its plant food, viz: Phosphoric Acid and Nitrogen, is available to the plants--but it cannot compare in strength with the Animal Fertilizers.

Stable Manure contains 1,600 pounds of water to the ton, or more than ten times as much as the Animal Fertilizers.

It takes 30 to 40 cords of Stable Manure to equal the plant food found in 1 cord of Animal Fertilizers.

It takes vastly more labor to apply stable manure than to apply equal strength in Animal Fertilizers.

## PRE-HISTORIC CORN,

"The Greatest Novelty of the Age."

### Yellow Varieties.

**Golden Beauty**—An old standard large-yielding yellow corn. It is later than the Golden Dent, but makes a larger ear, and is a very popular field variety in some sections. Qt 10c, pk 35c, 1 bu \$1.10, 2 bu \$2. Sacked free.

**Improved Leaming**—A quick growing yellow variety, highly esteemed by those who have grown it. It usually produces two ears to the stalk. Qt 10c, pk 35c, 1 bu \$1.10, 2 bu \$2. Sacked free.

**Iowa Gold Mine**—A popular yellow Dent corn originated in Iowa. It has very long grains and very small red cob. Matures in about 95 days and has given fine satisfaction throughout the corn belt. Our seed was grown from direct headquarters stock. Qt 10c, pk 35c, 1 bu \$1.10, 2 bu \$2. Sacked free.

**Early Yellow Rose**—No corn has ever been grown that has made friends as rapidly as this where known. The stalks grow 8 to 10 feet high, full, dark foliage, setting its ears low, 4 to 5 feet from the ground; usually maturing 2 good sound ears. 8 to 12 inches long. In a test 70 lbs of ears shelled 64 lbs of corn. It will mature in 90 to 100 days. Qt 10c, pk 40c, 1 bu \$1.25, 2 bu \$2.25. Sacked free.

**Salzer's Golden 1XL**—Larger than Leaming and a very prolific variety of yellow corn; matures in 85 days. Pk 35c, 1 bu \$1.10, 2 bu \$2. Sacked free.

**Livingston's Golden Surprise**—Beautiful golden yellow, very prolific, with small cob and matures in 90 days. Pk 40c, 1 bu \$1.25, 2 bu \$2.25. Sacked free.

**Strawberry Improved**—Has striped grains and is a favorite corn with some growers. (110 days). Pk 35c, 1 bu \$1.10, 2 bu \$2.10. Sacked free.

The introducer speaks of it as follows: "After lying buried 3,000 years the seed of this corn is discovered and gives to the present generation the best connecting link with the people who inhabited our country in the dim, distant past."

The prevailing color is a beautiful dark bronze, gliding to a light bronze.

This variety is no doubt worthy a trial, if for no other reason than for the oddity of its beautiful bronze colored grain. A little planted this year would yield plenty of seed for another year's planting. However, should you have a surplus for your own planting, it would no doubt be wanted by the neighbors to try. Price, per pkt 10c, pt 20c, qt 30c, postpaid. Per peck, not prepaid, 50c, 1 bu \$1.60, 2 bu \$2.75. Sacked free.

### White Varieties.

**Iowa Silver Mine**—A pure white corn and cob; large, deep grain, maturing in about 100 days. Much resembling the Champion White Pearl. Qt 10c, pk 35c, 1 bu \$1.10, 2 bu \$2.00. Sacked free.

**Champion White Pearl**—(100 days). The stalk is short and thick, the ears grow from 8 to 12 inches in length, the grains are very deep. Two grains will more than span the cob. By a test 70 ears weighed 87 lbs. It makes a superior quality of corn meal. We recommend it highly. Qt 10c, pk 35c, 1 bu \$1.10, 2 bu \$2.00. Sacked free.

**St. Charles White**—An old well known variety, early and productive, ears of ordinary size, plump and well filled, grain very white. Qt 10c, pk 35c, 1 bu \$1.10, 2 bu \$2. Sacked free.

**Hickory King**—This new white field corn is distinct from all other varieties. It has a very wide white grain, produces 2 to 3 ears per stalk; cob very small. Matures in 110 days. Qt 10c, pk 35c, 1 bu \$1.10, 2 bu \$2.00. Sacked free.

Seed Corn at 50c per bu, costs 7c per acre to seed; at \$1.14 per acre, or only about 1/3 the cost of seeding to oats, and the corn crop is always of more value than oats. It don't pay to plant poor seed when we offer selected seed corn at such low prices.

For larger quantities than quoted above write for special prices. Sample pkt Seed Corn, postpaid, 10c.

**Primitive or Husk Corn**—It is from this wild variety that all of our cultivated stock have sprung. The ears are of fair size, and each individual kernel or grain is covered with a husk and all enclosed in an outer husk like common corn. In some of the wild and uncultivated parts of Mexico the Primitive or natural corn can still be found growing wild. It is quite curious and valuable for exhibition purposes, and attracts great attention wherever seen. Some stalks bear as many as 20 ears. Large pkt 5c, 1/4 lb 15c, 1/2 lb 50c, postpaid.

**Pop Corn**—Rice Pop Corn—5c per select ear; 3 ears 10c; pkt shelled 10c, postpaid.

**Queen's Golden**—Largest eared and best for popping. Grows about 6 ft in height, bears 3 to 4 good ears to stalk. Ear 5c, 3 ears 10c, pkt shelled 10c postpaid.

**Mapledale Prolific**—The most prolific variety grown. Ear 5c, 3 ears 10c, pkt shelled 10c.

**FARM SEEDS, ETC.** TERMS CASH—With order. Prices subject to fluctuations. Two bushel seamless sacks 15c each extra. Burlap sacks 10c each extra. EXPRESS OR FREIGHT CHARGES always to be paid by purchaser. If wanted to be sent by mail, add 15c per quart or 8c per pound extra.

**CANE SEED. (Sorghum.)**

**Early Amber**—5c lb, 35c pk  
**Early Orange**—5c lb, 35c pk.  
**Cane Seed for Fodder**—For fodder sow about 50 to 100 pounds broadcast to the acre; yields 10 to 12 tons to acre. Price on application.

**KAFFIR CORN.**

One of the best things offered of late years for a forage plant. It is greedily eaten by horses and cattle, and makes excellent food for poultry, either fed in grain or ground and cooked. Will grow on land too poor for corn.

**White**—The best variety, per lb 5c, 25c pk.

**Red**—Similar to White; per lb 5c, 25c peck.

Write for special

prices on large quantities.

**BROOM CORN.**

**Improved Evergreen**—Long straight straw, 5c lb, 50c pk.

**Seed Oats. Red Rust Proof or Texas Red**—A hardy oat, supposed to be more free from rust than any other variety. Sample packet 10c postpaid, bu 50c.

**Common**—Red, gray, black and white at market prices. Write for special prices on large lots seed oats.

**JAPANESE BUCKWHEAT.**

**New Japanese**—This is the most productive of all Buckwheat, a week earlier than Silver Hull and the yield is nearly double.—The kernels are twice as large as any other variety and of a richer color; best for bees. Per lb 10c, pk 40c, bu \$1 50.

**Silver Hull**—Improved variety. Per pk 35c, bu \$1.25.

**DWARF ESSEX RAPE.**

Sow it during summer for fall and winter pasture. It is especially good for sheep, but all kinds of stock and chickens are fond of it and do well on it. It comes at a time of year when most needed. It grows best late in the summer or fall and yields an immense amount of feed. Is good to use as a "catch crop," sown on ground where other crops may for some reason

have failed, as it grows very quickly. Sow 5 pounds to the acre broadcast. Pkt. 5c, lb 25c, postpaid. Not prepaid, lb 15c, 5 lbs for 65c, 10 lbs for \$1, 100 lbs for \$8 00.

**Speltz**—An extremely productive grain resembling oats and requiring same culture. Pk 40c, ½ bu 75c, bu \$1.25.

**SEED RYE.**

**Choice White**—90c bu.

**Soja or Soy Beans**—Pt 10c, qt 15c, pk 75c.

**TEOSINTE.**

A most prolific forage plant. Resembles Indian Corn but the leaves are much longer and broader. Yielding enormously. One seed will produce 60 shoots. Pkt 5c, oz 10c, ¼ lb 35c, lb \$1.25.

**LAWN GRASS SEEDS.**

**Archias' Evergreen Lawn Grass**—Best mixture for a beautiful evergreen lawn—is a mixture of such grasses as will withstand the heat and dry weather of our summers. The soil should be put in good condition before sowing, and the lawn kept free from weeds the first season. The quantity of seed required is one pound to every 400 square feet. Pound 20c, 10 lbs \$1.60, 25 lbs \$3 75. If wanted by mail add 10c per lb to pay postage. It will add \$500 to the value of any farm to have a nice lawn around the house.
